

**Caltrain Centralized Equipment Maintenance and Operations Facility (CEMOF) Monitoring Committee - Quarterly Report**

|   |  |   |   |
|---|--|---|---|
| <b>Date of Report</b>   | Q4 Meeting, October 22, 2008   | <b>Report Issued by</b>   | Michael Smith (Chair), Elizabeth Monley, Sally Logothetti   |
| <b>Notes</b>  |  |   |   |
| <p>The CEMOF Monitoring Committee Quarterly Report supplements the official meeting minutes. It provides the community, the San Jose City Council, the Peninsula Corridor Joint Powers Board (JPB) and the Santa Clara Valley Transportation Authority (VTA) Board with a brief overview of unresolved issues. Each issue is assigned a tracking number when first added to the report and is removed from the report one quarter after being resolved.</p> |  |   |   |
| <b>Current Issues</b>   |  |   |   |
| <b>No.</b>  | <b>Issue</b>   | <b>Planned Action(s)</b>  | <b>Comment</b>  |
| 001   | Screeching train wheels on track relocated by Caltrain for CEMOF project. Primary noise sources are Union Pacific (UP) freight trains. In violation of Shared Objectives, Goal A (Eliminate objectionable noise during nighttime hours). | Union Pacific to install rail lubricator. Equipment to be provided by Caltrain. Ongoing equipment maintenance to be provided by UP.                     | Opened 10/26/05. Equipment installed by UP in August 2006. Noise reduced, but not eliminated. Reports indicate UP not consistently maintaining lubricator and wants to switch to different type. Trial run will be made with different type of lubricator as recommended by consultant following recently completed noise assessment. |
| 004   | Approval of pending Bylaw changes. New committee "alternate" clause is urgently needed to obtain a quorum when City Council and VTA representatives cannot attend in person.   | Bylaw changes to be written and approved by Committee, and then approved by City Council and JPB after review by City Attorney and JPB Counsel.         | Opened 1/25/06. First draft approved by Committee 7/26/06; second draft approved 10/25/06; third draft approved 8/12/08. Third draft also approved by JPB on 8/7/08 and is on City Council agenda for approval on 10/28/08.   |
| 010   | Garden Alameda neighbors report excessive nighttime noise due to extended engine idling. Potentially in violation of Shared Objective A-5 (Locomotives shall not be allowed to idle unnecessarily).                                      | Caltrain will first evaluate situation, including discussion with Amtrak management and stepped up monitoring by Caltrain staff during nighttime hours. | Opened 10/22/08. It needs to be determined if individual engines are being allowed to idle for extended periods of time or if extended idling noise results from multiple engines successively brought into facility following completion of daily service.   |
