

## Memorandum

**Date:** May 26, 2022  
**To:** CalMod Local Policy Maker Group (LPMG)  
**From:** Jadie Wasilco, Government and Community Affairs Manager  
**Re:** Caltrain Electrification Project E-Update

---

### Signal System Construction

Construction crews installed and tested the new signal system at 17 crossings in Burlingame and San Mateo in May. The new system has been successfully implemented at 24 of the 41 vehicular grade crossings that are needed before revenue service of Caltrain Electrification in 2024. Thank you to our local partners, especially the cities of Burlingame and San Mateo, for their close collaboration to enable this work.

### Caltrain Regular Service Schedule Restored

On Monday, May 23, Caltrain returned to its regular schedule, with 104 trains per day. Service had been operating at reduced levels since Monday, May 2, to accommodate electrification construction. With the return of regular service, riders can expect up to four trains per hour in each direction on weekdays, providing for a comfortable and convenient trip. Caltrain has yet to fully recover from the effects of the pandemic. To help increase ridership and improve equity, Caltrain has expanded its off-peak service,

allowing a wider range of riders to take advantage of the system.

## **PUBLIC MEETINGS:**

**JPB WPLP Committee Meeting – May 25 at 3:00 p.m. – Please note, this will be remote only**
