

CALTRAIN ELECTRIFICATION

5th AVENUE LANE CLOSURE NOTICE | August, 2021

UPCOMING ACTIVITIES AND LANE CLOSURE

Between August 17 and August 18, Caltrain will be performing signal potholing work that will require a partial lane closure of the 5th Avenue railroad crossing to vehicle traffic. The temporary lane closure is required due to construction equipment and crews entering and exiting the Caltrain right-of-way at 5th Avenue.

Work will take place on August 17, through August 18 with work hours between 7:30 a.m. to 3:30 p.m. each day.

5th Avenue will be partially closed during construction which will require flaggers to be present for traffic control.

Directional signs will direct vehicle and bicycle traffic to use the eastbound lane of 5th Avenue as a detour during construction. Crosswalks on the north and south side of 5th Avenue will remain open for pedestrian traffic. Weekend work will not be required.

A lane closure map is provided on the reverse of this notice for vehicle and bicycle traffic.

CONSTRUCTION ACTIVITIES

During the closure, crews will be performing potholing work for Caltrain Electrification signaling. Work will consist of using a vacuum truck to remove and replace dirt and pavement to verify signal cable can be installed in designated areas along the Caltrain right-of-way. Crews will utilize off-track equipment that requires the temporary westbound lane closure of 5th Avenue.

Crews will also be working along the Caltrain corridor to install foundations outside of the closure hours noted above. Work may take place during the day and at night, with night work occurring between 10 p.m. and 5 a.m. There may also be occasional 24-hour work on weekends.

Caltrain will work with contractors to minimize night work to limit the impact to surrounding communities; however, some work must be performed at

night in order to maintain regular Caltrain service. To mitigate noise and other impacts during night activities, the field team will utilize acoustical noise barrier blankets and will position lights away from residential and business areas. Caltrain has established a dedicated project hotline and email for residents concerned about these potential impacts.

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2024, will electrify and upgrade the performance, operating efficiency, capacity, safety, and reliability of Caltrain's commuter rail service.

Caltrain electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled with an electric train system for services between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric trains.

CONTACT INFORMATION

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**.

The project e-mail is calmod@caltrain.com
