

CALTRAIN ELECTRIFICATION

OLD COUNTY ROAD/STAFFORD STREET at BING STREET LANE CLOSURE NOTICE | July, 2022

UPCOMING ACTIVITIES AND LANE CLOSURE

On July 14 and July 15 Caltrain will be performing communications system work that will require a temporary closure of the southbound lane of Stafford Street/Old County Road at the intersection of Bing Street to vehicle and bicycle traffic. The temporary lane closure is required due to construction equipment, cranes and crews entering and exiting the Caltrain right-of-way.

Work will take place from 8 p.m. on July 14 to 5:30 a.m. on July 15.

Directional signs will direct southbound traffic to the northbound lane of Stafford Street/Old County Road. Flaggers will be present to assist vehicle and bicycle traffic.

A detour map is provided on the second page of this notice for vehicle and bicycle traffic.

CONSTRUCTION ACTIVITIES

During the closure, crews will install communications equipment on the overhead contact system (OCS) infrastructure. Crews will utilize on-track equipment that requires the temporary closure of the lane.

Crews may also be working along the Caltrain corridor to install OCS infrastructure outside of the closure hours noted above. Work may take place during the day and at night, with night work typically occurring between 10 p.m. and 6 a.m. There may also be occasional 24-hour work on weekends.

Caltrain will work with contractors to minimize night work to limit the impact to surrounding communities; however, some work must be performed at night in order to maintain regular Caltrain service. To mitigate noise and other impacts during night activities, the field team will utilize acoustical noise barrier blankets and will position

lights away from residential and business areas. Caltrain has established a dedicated project hotline and email for residents concerned about these potential impacts.

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2024, will electrify and upgrade the performance, operating efficiency, capacity, safety, and reliability of Caltrain's commuter rail service.

Caltrain electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled with an electric train system for services between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric trains.

CONTACT INFORMATION

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**.

The project e-mail is calmod@caltrain.com
