

CALTRAIN ELECTRIFICATION

OAK GROVE AVENUE CLOSURE NOTICE | June, 2021

UPCOMING ACTIVITIES AND LANE CLOSURE

On June 28, Caltrain will be performing foundation installation work in Menlo Park that will require a temporary closure of the Oak Grove Avenue railroad crossing to vehicle and bicycle traffic. The temporary closure is required due to construction equipment and crews entering and exiting the Caltrain right-of-way at Oak Grove Avenue.

Between 7:45 p.m. on June 28 and 5:30 a.m. on June 29 there will be a temporary closure of the Oak Grove Avenue railroad crossing.

Directional signs will direct vehicle and bicycle traffic to use Glenwood Avenue as a detour on the night of the closure. The crosswalks on the north and south side of Oak Grove Avenue will remain open for pedestrian traffic during construction.

A detour map is provided on the reverse of this notice for vehicle and bicycle traffic.

CONSTRUCTION ACTIVITIES

During the closure, crews will install concrete foundations for Caltrain Electrification. Work will consist of excavation, placement of rebar, concrete fill, electrical grounding, and the installation of foundations.

Crews will also be working along the Caltrain corridor to install foundations outside of the closure hours noted above. Work may take place during the day and at night, with night work occurring between 10 p.m. and 5 a.m. There may also be occasional 24-hour work on weekends.

Caltrain will work with contractors to minimize night work to limit the impact to surrounding communities; however, some work must be performed at night in order to maintain regular Caltrain service. To mitigate noise and other impacts during night activities, the field

team will utilize acoustical noise barrier blankets and will position lights away from residential and business areas. Caltrain has established a dedicated project hotline and email for residents concerned about these potential impacts.

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2024, will electrify and upgrade the performance, operating efficiency, capacity, safety, and reliability of Caltrain's commuter rail service.

Caltrain electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled with an electric train system for services between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric trains.

CONTACT INFORMATION

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**.

The project e-mail is calmod@caltrain.com
