

CALTRAIN ELECTRIFICATION

ALMA STREET LANE CLOSURE NOTICE | September 2022

UPCOMING ACTIVITIES AND CLOSURE

On the evenings of September 22 through September 23, Caltrain will be conducting signal house installation work that will require temporary lane closures of the northbound and southbound lanes of Alma Street at Churchill Avenue to vehicle and bicycle traffic.

From 11 p.m. to 5 a.m. from September 22-23, 2022 there will be temporary closure of a northbound lane of Alma Street at Churchill Avenue.

Illuminated and directional signs will direct the merging of vehicle and bicycle traffic of Alma Street at Churchill Avenue. Northbound traffic on Alma Street intending to turn west on Churchill Street will be detoured to Kellogg Avenue, Emerson Street then to westbound Churchill Avenue. The sidewalk on the east side of Alma Street will be open to pedestrian traffic during construction.

During construction, crews will provide crossing access to Emergency First Responders.

Lane closure maps and detour maps are provided on the reverse of this notice for lane closures for the northbound and southbound lanes of Alma Street and the westbound detour map for Churchill Avenue.

CONSTRUCTION ACTIVITIES

During the closure, crews will be utilizing an overhead crane to set a signal house at the location. Utilization of the crane by the crew requires the temporary closure of a northbound lane of Alma Street.

Caltrain will work with contractors to minimize night work to limit the impact to surrounding communities; however, some work must be performed at night in order to maintain regular Caltrain service. To mitigate noise and their impacts during night activities, the field team will utilize acoustical noise barrier blankets and will position lights away from residential and business areas.

Caltrain has established a dedicated project hotline and email for residents concerned about these potential impacts.

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2024, will electrify and upgrade the performance, operating efficiency, capacity, safety and reliability of Caltrain's commuter rail service.

Caltrain electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled with an electric train system for services between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric trains.

CONTACT INFORMATION

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**.

The project e-mail is calmod@caltrain.com
