Regional Network Management (RNM)

- During the RNM Business Case evaluation process, **six functional areas** were chosen for further consideration as they were deemed representative of the challenges facing Bay Area transit:

Accessibility

Bus Transit
Priority

Connected
Network
Planning

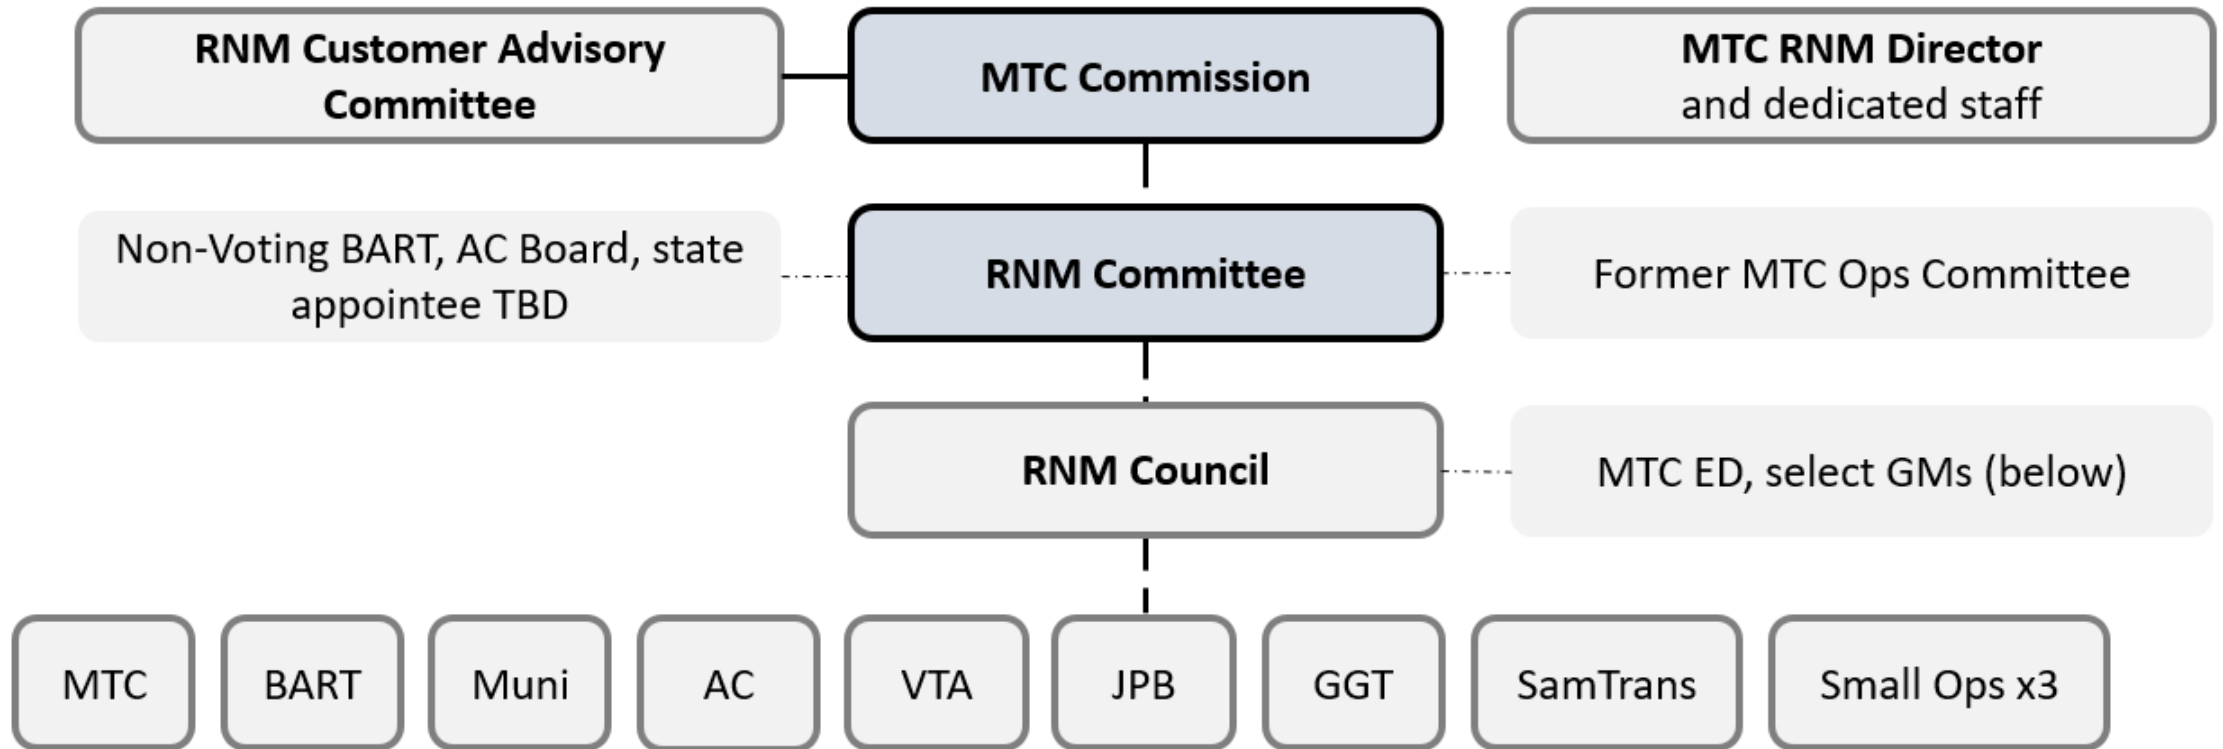

Fare
Integration
Policy

Rail Network
Management

Wayfinding
and Mapping

Regional Network Management (RNM)

- **New Phase:** MTC is standing up the governance structure and hiring dedicated RNM staff this summer.

Regional Network Management (RNM)

- **RNM Director** – new MTC position posted, reporting to the MTC Deputy Executive Director.
 - Position closes early July, MTC expects to have the Director onboard by late August.
- **RNM Committee** – first meeting scheduled for **Friday, July 14**.
- **RNM Council** – first meeting scheduled for **Monday, July 24**.
- **RNM Customer Advisory Committee** – first meeting anticipated in **September**.
- **Funding** – RNM funding structure still TBD.

Bay Pass Pilot Development

- **Phase 1:** 2022 – 2023 proof of concept pilot, with five participating institutions and 50,000 distributed passes.
- **Phase 2:** 2023 – 2026 proposed pilot expansion covering 10+ additional institutions in the Bay Area. Areas of Caltrain concern include:
 1. Revenue neutrality for participating operators
 2. Potential impacts to existing Go Pass program
 3. Limited detail on pilot or program governance structure
 4. Pilot schedule.
- Caltrain actively working with MTC to address issues, with additional JPB updates to come.
- Collaborating with JPB Member Agencies and other Bay Area operators with institutional pass programs.
